

FlexWall® Plus FW80/2

Volumetric and gravimetric

General Information

The FlexWall®Plus [FW80/2](#) feeder is ideal for poor or difficult flowing bulk ingredients. The feeder has the following main components: a stainless steel trapezoidal housing, a flexible polyurethane trough with a large cross-section, external massage paddles with separate drive, a screw, a screw tube, 3 phase motor and a trapezoidal extension hopper with volumes of 100 dm³(3.53 cuft) or 200 dm³ (7.06 cuft).

The shape of the trough and the external adjustable amplitude massage paddles work together to provide consistent screw filling and mass flow without ingredient deterioration. The FW80/2 features a separate paddle drive to allow paddle speed adjustment for difficult flowing ingredients.

The [FW80/2](#) features a hinged motor for screw change from the rear.

The FlexWall®Plus is easily disassembled for wet or dry cleaning as the polyurethane hopper that is attached to the housing is easily removed. Moreover, the [compact trapezoidal shape](#) allows up to 6 feeders to be arranged around a central feed point. Service can be from the front or back.

The gravimetric version includes the analog weighing system [MS6](#), or the digital weighing system [MD6](#) (for highest measurement accuracy), featuring a high resolution robust digital load cell with serial data transmission and advanced filtering technology.

The unit conforms to CE directives.

* Theoretical values at 100% screw filling level and motor speed. Depending on the flow characteristics the screw filling level may decrease to 50%.

Further limitations have to be considered for gravimetric feeding, as max. speed should be reduced to allow for bulk density variations.

**alternatively also available as stainless steel version
